Gapwaves AB Interim Report January–March 2023, Q1

First quarter January–March 2023

- Net sales decreased to MSEK 4.9 (5.8).
- EBITDA fell to MSEK -16.1 (-8.2).
- EBIT decreased to MSEK -18.3 (-9.8).
- Loss for the period amounted to MSEK –17.9 (–10.0).
- Earnings per share before and after dilution were negative (neg.).
- Cash flow for the period amounted to MSEK –13.3 (–17.8).
- Cash and cash equivalents for the Group amounted to MSEK 172.2 (193.4).

- An order was received from Hella for a new generation of 77 GHz radar sensors for a total value of approximately MSEK 3.8.
- Gapwaves entered into a development and delivery agreement with Smartmicro for high-resolution radar antennas for traffic management for a total value of approximately MSEK 9.
- An order was received from a leading European Tier 1 supplier that is new to Gapwaves to define a first joint development project for a radar antenna, with an order value of approximately MSEK 0.5.

Significant events after the end of the period

• No significant events to report after the end of the quarter.

Strategic projects progressing according to plan and interest rising

Increasing interest continues to be being shown in Gapwaves and products featuring our technology. The projects we are carrying out with customers in Automotive and Mobility are progressing according to plan and are rising in number.

Net sales for the guarter amounted to KSEK 4,875 (5,774), which is a year-on-year decline of 15.6%. EBITDA amounted to KSEK -16,089 (-8,231). The differences compared with last year were primarily due to higher investments in the organization to both expand capacity and expertise ahead of the start of production in 2024, and to qualify Gapwaves as a fully approved supplier in Automotive. Furthermore, we incurred higher costs during the quarter related to the evaluation of other patents in the technology field in order to continue to safeguard Gapwaves' strong patent position. We predict that this will continue since the interest in our waveguide antennas for applications in Automotive is increasing, and we need to carefully monitor the patent situation. During the quarter, we also

incurred higher personnel costs in connection with the succession of a new CEO and work on developing the company's strategy and future position in the value chain.

Strong market development

The market is developing strongly and demand for vehicle radars is rising. In Automotive, radar technology is now used in, for example, emergency braking systems (which is a legal requirement in the EU since March 2022), Lane Centre Assist and cruise control. In addition, vehicle manufacturers have identified a need for more advanced highresolution radar sensors so that in four to five years they can offer a higher degree of self-driving in certain controlled situations. In Mobility, meaning such applications as drones, delivery trucks, freight vehicles and various types of transportation pods, companies are even now working with solutions that require high-resolution vehicle radars.

Immense project potential

Volumes in Mobility are lower than in Automotive, but customers in this segment are willing to pay significantly more per antenna compared with Automotive.

The period in brief CEO Statement About Gapwaves Financial overview

Other disclosures Share and shareholders

Financial statements Signatures and assurance

"We are in a solid position for continued growth"

Projects targeting stakeholders in Automotive have very big long-term potential based on their volumes and predictability due to the long product cycles in the industry. Series in Mobility can normally run into the tens of thousands, while in Automotive they could be more than several million every year, and up to about 100 million in total.

Gapwaves' antennas are included in systems customized for each supplier and form the basis of a business that extends over at least six to eight years in peak volumes. The technology and products are so integrated with a vehicle manufacturer's product that it is difficult and costly to replace it with a product from another manufacturer.

We have designed products together with Hella that are expected to be found in passenger cars on the road within two years, and production of these will commence in 2024. We also previously received orders from Hella under which we will jointly develop their new generation of radar sensors that will be the sequel to the generation that will start to be produced in 2024. In the past quarter, we received another follow-up order from Hella for their next generation of 77 GHz radar sensors.

Our partnership with Bosch is proceeding according to plan, and the antenna we are jointly developing is scheduled for high-volume production in 2026–2027.

A development and delivery agreement was also signed with Smartmicro during the quarter for highresolution radar antennas for traffic management. With this agreement, both companies are deepening their collaboration on Gapwaves' unique antenna technology. In addition to paid development activities, Smartmicro has undertaken to order antennas over a three-year period. We view this transaction as confirmation of the value that Gapwaves' antennas add to the market for radar sensors in verticals outside Automotive and Mobility.

Projects on the threshold to commercialization

The economic downturn that has impacted the world has not yet affected our industry to any large extent. On the contrary, we are continuing to see strong and growing interest from our customers, primarily in Automotive.

We have a number of projects in progress together with tech companies in Mobility, and many of these projects are relatively close to commercialization. Restructuring is currently taking place at some of these companies to reduce costs and adapt business models, which had resulted in decisions that in the short term affect schedules and mean that a few projects have thus been delayed.

An opportunity to grow in the value chain

Many players in Mobility are now carrying out their own development projects in high-resolution radar sensors for Automotive, and in customer projects we have seen demand for end-to-end radar sensors based on Gapwaves' antenna technology. As a result, we initiated efforts during the quarter to investigate opportunities, together with a partner, for developing and offering end-to-end radar sensors in this segment that uses Gapwaves' antenna technology for superior performance. According to the customers we already work with, this will make it easier for the industry and lead to shorter cycles. For Gapwaves, it presents an opportunity to move up in the value chain.

I am very confident about progress, and I am proud of what we are achieving together!

Gothenburg, April 27, 2023

Jonas Ehinger CEO Gapwaves AB (publ)

Financial statem<u>ents</u> Signatures and assurance

About Gapwaves

Gapwaves AB (publ), Corp. Reg. No. 556840-2829, is a Parent Company registered in Sweden with its headquarters in Gothenburg.

Gapwaves AB originates from research conducted at Chalmers University of Technology and was founded in 2011 to commercialize innovations for products with mm-wave technology.

Gapwaves vision is to be the most innovative provider of mm-wave antenna systems and the preferred partner to those pioneering next generation wireless technology. By leveraging the disruptive Gapwaves technology we help pioneers in automotive and telecom to create highly efficient mm-wave antenna systems that contributes to re-defining everyday life.

Regulations and testing drive radar volumes and waveguide antennas

As of 2022, 76-81 GHz frequency band is the only approved frequency band for vehicle radars. The broadband part of the spectrum for the frequency band that was previously allocated at 24 GHz has been completely removed. The shift in the global standard for vehicle radars has resulted in the automotive industry placing higher demands on radar performance, and radars needing to cover the entire frequency band of 76-81 GHz, requirements that traditional circuit-board-based (PCB) antenna technology cannot fully meet.

Furthermore, the EU has introduced new legal requirements and Euro NCAP* has introduced new test protocols, which have become strong driving forces for increasing radar volumes and growing demand for high-performance and cost-efficient waveguide antennas. All new car models from 2022 must have one to seven radars in their sensor suit and the trend is moving toward leading Tier 1 suppliers and automotive manufacturers planning to use waveguide antennas in their future radar sensors.

Gapwaves is well positioned to capture a large market share of the high-volume production in vehicle radar, as our patented technology offers the unique possibility to manufacture antennas in high volumes, with a high performance and cost-efficiently. These are advantages that will significantly increase the demand for Gapwaves' antennas when radar sensors and advanced vehicle safety become standard in most car models.

^{*} Euro NCAP, The European New Car Assessment Program. An organization that designs and performs vehicle testing using a five-star safety rating system. These tests simplify real accident scenarios that could result in passengers or other road users being injured or dying.

Focus areas 2023

The greatest advantages of Gapwaves' technology can be applied in the markets for radar sensors for Advanced Driving Assistance Systems (ADAS) and autonomous vehicles. It is also in these areas that we have noted the greatest interest from the market.

By entering into agreements and partnerships with Veoneer, Hella and Bosch, Gapwaves has assumed a strong position as a leading global supplier of waveguide antennas in the markets for ADAS and varying types of autonomous vehicles. Gapwaves has a solid basis for continued growth, which also includes own volume production beginning in 2026. This position creates synergies in efforts to secure more business, for which Gapwaves can offer development and design of antennas and also in-house high-volume production. This is in line with the long-term plan and brings the company closer to its vision: Gapwaves' antenna technology will become standard for antennas for radar sensors.

From ongoing dialogue with customers in Mobility, we have seen demand for end-to-end radar senors based on Gapwaves' antenna technology. In 2023, Gapwaves will investigate opportunities, together with a partner, for developing a end-toend radar sensor based on Gapwaves' antenna technology for this customer segment. For Gapwaves, this would mean further advancement up the value chain.

Financial overview

January–March 2023

Net sales

The Group's net sales for the first quarter amounted to KSEK 4,875 (5,773), corresponding to a decline of 15.6%. Net sales were primarily attributable to project and prototype revenue from Bosch, Hella and a pilot study for a leading European Tier 1 supplier that is new to Gapwaves. Lower sales were the result of the company's business varying widely between different guarters, and the fact that it currently primarily targets major long-term development projects. In addition to income from customer engagements, subsidies from three research projects amounting to KSEK 1,349 and positive exchange rate gains of KSEK 170 were recognized under other operating income.

EBITDA

Earnings before interest, taxes, depreciation and amortization (EBITDA) for the quarter was KSEK -16,089 (-8,231). Operating expenses excluding depreciation/amortization amounted to KSEK 22,483 (15,212). The lower EBITDA for the quarter was largely due to increased personnel costs attributable to a higher number of staff, costs related to the CEO succession and provisions for employee bonuses. The Group also had increased expenses for consultants, higher travel costs and patent expenses.

EBIT

EBIT for the quarter was KSEK -18,347 (-9,809).

Net financial items

Net financial items amounted to KSEK 474 (-186), attributable to interest income for bank deposits.

Loss for the period

Loss for the period was KSEK -17,873 (-9,995).

Financial position and liquidity

Total assets on March 31, 2023 amounted to KSEK 233,817 (238,872). Equity on March 31, 2023 was KSEK 204,007 (217,881). Cash and cash equivalents on March 31, 2023 amounted to KSEK 172.160 (193,361). Gapwaves does not have any financial liabilities.

Cash flow and investments

Cash flow from operating activities amounted to KSEK –12,754 (–14,110). Cash flow from investing activities amounted to KSEK -513 (-3,819). Cash flow from financing activities amounted to KSEK 0 (133). The cash flow strengthened during the period to KSEK -13,268 (-17,796).

Accounting policies

The company applies the Swedish Annual Accounts Act and Swedish Accounting Standards Board's general advice BFNAR 2012:1 Annual reports and consolidated financial statements (K3). All balancesheet items are also measured at historical cost in accordance with Chapter 11 of K3.

Risks and uncertainties

Operational risks

In the daily operating activities, there are risk factors that may affect the company's business and financial position. The risks are associated with the development operations running according to plan, that the company can recruit qualified personnel and that the technology can be industrialized to the extent that scalability is achieved. In order to develop a component that is part of a larger system, the company is dependent on cooperation with other component manufacturers and customers with the risk that Gapwaves experiences shortages of components and deferred or canceled projects.

Market risks

Gapwaves' technology is mainly being used as a component in a larger system, for example, in vehicle radar or mobile telecommunications networks. As such, there are risks linked to potential customers' preferences for the technology, to the integration of the technology as well as the demand for the final product. As a developer of products that are not currently on the market, there are risks and uncertainties linked to schedules, customer needs and competitors. A delay or failure to introduce the next generation of vehicle radar in the automotive industry or the introduction of 5G in the telecom industry may entail a risk of lower growth rates in the area than expected.

Russia's invasion of Ukraine has severely affected the global economy and created great uncertainty. Gapwaves has no ongoing business with either Russia or Ukraine and has so far not been adversely affected by the war. Gapwaves is monitoring the situation related to the war with contingency plans in place to minimize any negative effects. Continued high interest rates, energy prices and inflation that affected the world during 2022 and the start of 2023 have not adversely affected Gapwaves to date. However, for Gapwaves, like for other companies, the situation may change since the future is difficult to assess.

Financing risk

The company is financed through equity. Even if the company generates revenue, capital needs may arise as the company grows. In this case, the company will also be exposed to financing risks. Following the share issue that was carried out in connection with Hella joining as owner in June 2021, the Board assesses that the company is well capitalized and that the financing risk has decreased in the short term.

Financial calendar

- Q2 2023 Interim Report: August 23, 2023
- Q3 2023 Interim Report: October 26, 2023
- 2023 Year-end Report February 9, 2024

Seasonal variations

Over the next few years, the company's sales are expected to largely comprise development projects that reflect customer needs and product development cycles. This is expected to create a certain level of volatility in sales between quarters.

Organization

The number of permanent employees in the Group as per March 31, 2023 was 31 (28).

ESG activities

Work on establishing a long-term plan and strategy commenced during the quarter.

Gapwaves' Quality Director was appointed to lead this work going forward. He will now take up the role of Quality & Sustainability Director.

Warrants Series 2022/2025

At the Extraordinary General Meeting on June 10, 2022, the shareholders decided to issue a warrant program (Series 2022/2025) for all permanent employees (540,000 warrants) and the Board of Directors (100,000 warrants), a total of 640,000 warrants. The warrants may be exercised for subscription of B shares in the company during the period between June 9, 2025 and August 29, 2025. A total of 502,541 warrants were subscribed for at a subscription price of SEK 38.20. The price per warrant was set at SEK 7.18 through an external valuation. The total dilutive effect on full exercise is expected to be approximately 2.3% of the outstanding capital and 0.65% of the outstanding votes.

Related party transactions

The company did not have any transactions with related parties during the first quarter of 2023.

Annual General Meeting

The Annual General Meeting (AGM) for the 2022 financial year will be held on May 3, 2023 between 1:00 and 2:00 p.m. in the company's premises on Nellickevägen 22 in Gothenburg, Sweden. Additional information is available on the company's website and in the notice of the AGM.

Review by auditors

This report is unaudited.

Significant events during the quarter

Financial

- An order was received from Hella for a new generation of 77 GHz radar sensors for a total value of approximately MSEK 3.8.
- Gapwaves entered into a development and delivery agreement with Smartmicro for high-resolution radar antennas for traffic management for a total value of approximately MSEK 9.
- An order was received from a European Tier 1 supplier that is new to Gapwaves for a pilot study, with an order value of approximately MSEK 0.5.

About Gapwaves AB

Gapwaves AB (publ) originates from research conducted at Chalmers University of Technology and was founded in 2011. Gapwaves vision is to be the most innovative provider of mm-wave antenna systems and the preferred partner to those pioneering next generation wireless technology. By leveraging the disruptive Gapwaves technology we help pioneers in automotive and telecom to create highly efficient mm-wave antenna systems that contributes to re-defining everyday life. Gapwaves' share (GAPW B) is traded on the Nasdaq

First North Growth Market Stockholm with G&W Fondkommission as certified adviser.
